

EMPLOYMENT OPPORTUNITY ELECTRICAL ENGINEER - MULTIPLE POSITIONS ENTRY THROUGH MID LEVEL

Position: Electrical Engineer **Position Type:** Full time, salaried with benefits.

Position Description:

This position is for entry through mid-level Electrical Engineer responsible for the design and evaluation of electrical systems for commercial office, institutional, and light industrial facilities. Electrical engineer is responsible for the design of lighting, power, fire alarm, standby generator and UPS systems. The engineer will perform system design calculations, visit project sites, document existing conditions and provide detailed coordination of designs with clients, architects and mechanical engineers. The selected individual will be exposed to all technical and operational aspects of the firm. This is an exceptional opportunity which requires a unique individual.

Qualifications:

- BSEE and course work in architectural engineering or power systems
- Registered EIT preferred
- Proficiency in AutoCAD and/or Revit preferred
- Superior written and verbal communication skills
- Highly motivated and eager to learn
- Extremely organized and able to handle multiple tasks and projects simultaneously
- US Citizenship required
- Mid-level candidates shall have 7-10 years of applicable experience, proficient in AutoCAD and/or Revit, Licensed Professional Engineer preferred

Please note this position is in the Architectural/Engineering (A&E) field. **This is not an IT engineering or electronic engineering position.** Please apply only if you are interested in engineering of commercial building systems.
